

INDOOR AIR QUALITY WAIVER

OKANOGAN COUNTY PUD # 1

DISCLAIMER

If you choose to install storm windows, thermal windows, caulking, weather-stripping and/or blown-in wall insulation (tightening measures), air infiltration into your building will be reduced. Reduced air infiltration will reduce the amount of energy required to heat your building. However, the reduced air infiltration will permit a build-up of pollutants, if present, in the air of your building.

THERE IS EVIDENCE THAT EXPOSURE TO SUCH POLLUTANTS, EVEN AT LOW CONCENTRATIONS, MAY ADVERSELY AFFECT YOUR HEALTH.

If you have any questions regarding pollutants please call the District before you decide to install tightening measures in your building and before you sign this Waiver and Release of Present and Future Claims.

If you choose to install storm windows, thermal windows, caulking, weather-stripping and/or blow-in wall insulation and receive payment from the District under the Residential Weatherization Program, the District is not liable, by virtue of providing services or payment for the purchase or installation of these weatherization materials, in any suit or action involving a District customer or occupants of such customer's building.

If you choose to monitor air quality or have any air quality mitigation devices installed in your building, the District makes no expressed or implied warranty, or any representation of any kind regarding the effectiveness of said devices to improve air quality in a weatherized building, and the District is not liable by virtue of providing services or payment, in any suit or action involving a District customer or occupants of such customer's building.

WAIVER AND RELEASE OF PRESENT AND FUTURE CLAIMS

I have read the above disclaimer statement and understand it. In consideration of receiving the benefits and payments under the Residential Weatherization Program, I agree that I will not make any claim or demand against the District, and hereby release and discharge the District from any and all claims, demands, liabilities, suits, causes of action, for any damage or injury arising, resulting or which in the future may result, directly or indirectly, from any reduction in air infiltration into my building and any associated increase in the concentration of air pollutants in my building.
