Report of Independent Auditors

To the Commissioners
Public Utility District No. 1
of Okanogan County, Washington

Report on the Financial Statements

We have audited the accompanying financial statements of Public Utility District No. 1 of Okanogan County, Washington (the District), which comprise the statements of net position as of December 31, 2019 and 2018, and the related statements of revenues, expenses, and changes in net position and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the District as of December 31, 2019 and 2018, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the accompanying management's discussion and analysis, schedule of proportionate share of the net pension liability, and schedule of employer contributions be presented to supplement the financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplemental Information

The supplemental information as presented in the table of contents has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated May 29, 2020, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Everett, Washington

Moss adams HP

May 29, 2020

The following discussion and analysis is designed to assist the reader in focusing on the significant financial issues, provide an overview of Public Utility District No. 1 of Okanogan County's (the District's) financial activity, and identify changes in the District's financial position during 2019 and 2018. Please consider the information presented here in conjunction with the financial statements as a whole, including the footnotes and other supplementary information that is provided.

The District, a municipal corporation of the state of Washington, was established in 1936 and began operations in 1945. The District is governed by a three-member board of commissioners locally elected to six-year terms. The District operates both electric and telecommunications systems that are accounted for in a single proprietary fund.

Overview of the Financial Statements

The financial statements include the management's discussion and analysis and financial statements with accompanying notes. In accordance with standards issued by the Governmental Accounting Standards Board (GASB), the District's financial statements are presented on an accrual basis of accounting, which recognizes revenues when earned and expenses when incurred, regardless of when cash is received or paid.

The basic financial statements are presented as of and for the years ended December 31, 2019 and 2018, and consist of:

Statements of net position – The statements of net position present information on the District's assets, deferred outflows of resources, liabilities, deferred inflows of resources, and net position at year-end. These statements also provide information about the nature and amounts of investments in resources (assets) and the District's obligations to its creditors (liabilities).

Statements of revenues, expenses, and changes in net position – The statements of revenues, expenses, and changes in net position account for the year's revenue and expense transactions. These statements measure the District's operations over the past year and may be used to determine whether the District has been successful in recovering its costs through rates and other charges.

Statements of cash flows – The statements of cash flows provide information on the District's cash receipts and disbursements during the year. The statements report changes in cash resulting from operations, investing, and capital and related financing activities.

The notes to the financial statements provide additional information that is an integral part of the financial statements. This information includes the disclosure of significant accounting policies, financial activities, risks, commitments, and obligations.

Financial Highlights

During 2019, the District's overall financial position stayed positive with only a slight increase in retail electric load of 0.2%. The slight increase in retail sales was driven by an increase in residential loads and decreases in all other classes. The District did benefit from a 1.5% retail electric rate increase that went into effect on April 1, 2019. Wholesale energy sales decreased in volume, but the average price per kilowatt hour increased. As a result, the District's wholesale revenues were down 2.6%. The District's net position increased \$2,495,717 compared with an increase in net position in 2018 of \$4,304,903.

The following is an analysis of key financial factors with an emphasis on changes between 2019 and 2018:

Cash and investments – The District had cash and investments totaling \$20,261,812, \$23,852,650, and \$24,936,189 as of December 31, 2019, 2018, and 2017, respectively. The decrease in cash and investments of \$3,590,838 during 2019 was due to a combination of lower than expected retail energy sales and the District's capital outlay program. As noted in Note 2 to the financial statements, investments in the amount of \$11,062,628 are considered restricted as of December 31, 2019. The funds are restricted as follows: \$283,128 for debt service payments, \$1,944,500 for bond reserve requirements, \$2,700,000 for customer deposits and compensated absences, \$135,000 for vehicle replacement reserve, and the remaining \$6,000,000 is restricted in a rate stabilization fund.

Utility plant – Net utility plant increased \$2,180,059, or 2.0%, during 2019, compared with a decrease of \$15,919,698, or 12.6%, during 2018. A summary of utility plant in service is included in Note 3 to the financial statements.

Long-term debt – As of December 31, 2019, the District had \$25,647,405 in revenue bonds outstanding, compared with \$27,615,271 as of December 31, 2018. During 2019, the District did not issue additional revenue bonds. The decrease in revenue bonds outstanding was a result of scheduled debt payments made during 2019.

In addition, in 2010, the District authorized a not-to-exceed \$3,667,855 loan with the United States Department of Agriculture (USDA) for broadband improvements (the RUS Note) related to the American Recovery and Reinvestment Act (ARRA) award. As of December 31, 2019, the RUS Note had a balance outstanding in the amount of \$2,672,253.

In 2017, the District replaced its \$10,000,000 line of credit with a new line of credit with an aggregate principal amount not to exceed \$20,000,000, to cover operating costs and capital outlays as the need arises. As of December 31, 2019, the entire \$20,000,000 is available to the District if needed.

Net operating revenues – The District recorded revenues from operations of \$54,295,622, which was \$1,564,197 more than operating expenses of \$52,731,425 during 2019, in comparison with 2018, when operating revenues exceeded operating expenses by \$4,065,404. In 2017, operating revenues exceeded operating expenses by \$6,073,364.

Financial Highlights (continued)

Operating revenue – Revenues from the retail sale of electricity increased by 2.8%, from \$44,579,946 in 2018 to \$45,810,067 during 2019, compared with a decrease in retail sales in 2018 of 4.4%. The increase during 2019 was due to a slight increase in retail energy load of 0.2% and an April 1, 2019, retail electric rate increase of 1.5%.

During 2019, revenue from wholesale sales of electricity decreased slightly by 2.6%, from \$3,983,254 in 2018 to \$3,880,384. The decrease in revenue from wholesale sales of electricity was due to less surplus energy to sell on the market than in 2018. In 2018, wholesale electricity increased 85.6% from \$2,145,929 in 2017 to \$3,983,254.

In 2019, wholesale telecommunications revenue decreased 4.9% to \$2,831,472, compared with \$2,978,557 in 2018 and \$2,928,695 in 2017. The decrease in revenue during 2019 was expected due to repricing of products to align better with market pricing.

Operating expenses – Operating expenses increased by \$3,501,073, or 7.1%, from \$49,230,352 in 2018 to \$52,731,425 in 2019 in comparison to an increase in operating expenses during 2018 of 3.7%. The 2019 increase in operating expenses is due in large part to increases in the cost of purchased power caused by resource shortages in February and March, which were compounded by inflated market prices.

Rates – During 2019, the District increased retail energy rates by 1.5% on April 1, 2019. The District does pass through increases in contracted power costs to its customers using a cost of power adjustment (COPA). The COPA was not increased during 2019 and was last adjusted on February 1, 2018.

Significant Capital Assets and Long-Term Debt

The District does anticipate issuing new debt in the future to finance projects as discussed in the following paragraphs:

The District continues to invest in wholesale telecommunications infrastructure. As of December 31, 2019, the District has invested a total of \$16,029,309 in wholesale telecommunications plant in service, which is an increase of \$491,188 over year-end 2018. The District's telecommunications network is connected to the Northwest Open Access Network, a fiber optic system that is member owned. The network is currently utilized by eight retail service providers, supporting over 3,000 end-user customers.

Significant Capital Assets and Long-Term Debt (continued)

The District is the current owner of the Enloe Hydroelectric Dam, a small nonoperating hydroelectric project on the Similkameen River near Oroville, Washington. On July 9, 2013, the Federal Energy Regulatory Commission (FERC) issued the District a new 50 year operating license. During 2018, the District selected a design/build partner and signed an agreement for Phase 1 of the project. Phase 1 of the project was completed during the fall of 2018 and a 30% design, construction schedule and not to exceed construction costs was developed. On November 1, 2018, the District was informed by its design/build partner that the guaranteed maximum price would be \$70.4 million (plus tax and District costs during construction), more than twice initial estimates. At the District's board meeting on November 19, 2018, the Board directed staff not to pursue electrification Enloe Dam and granted staff 120 days to assess all option for owning and managing Enloe Dam. As a result of this action the District recorded project costs to date in the amount of \$18,793,376 as an extraordinary item for the year ended December 31, 2018, and transferred the licensing and engineering costs off of its books. During 2019 the District focused on dam safety, including a dewatering and inspection plan.

The District has completed repairs as a result of damages caused by two years of wildfires. During 2014 the Carlton Complex Fire consumed more than 250,000 acres located in Okanogan County. The District's loss of infrastructure due to the fire was significant, amounting to almost \$3 million in historical costs and over \$11.5 million in replacement costs. The 2015 Okanogan Complex Fires burned over 300,000 acres located in Okanogan County. The District's loss of infrastructure due to the 2015 fire was in excess of \$1.6 million in historical costs and over \$4.5 million in replacement costs. At the end of 2019, all repairs had been completed for both fires. The District received \$883,862 in reimbursements from the Federal Emergency Management Agency in 2019 for the Carlton Complex fires and another \$624,265 in 2020 for repairs related to the Okanogan Complex fires.

During 2019, the District updated its equity management plan and performed a cost of service study. As part of that process four projects were identified, which the District plans to fund, at least in part, by issuing additional debt. The planned debt issuance of approximately \$20,000,000 will partially fund the purchase of Chicken Creek Substation, conduct Enloe Dam inspection, rebuild the Tonasket Substation and rebuild a 26-mile transmission line between Brewster, Washington, and Okanogan, Washington. The balance of funds needed for these project will be funded through reserves and rates.

Additional information is contained in the notes to the financial statements. Please refer to Note 3, Utility Plant, and Note 4, Long-Term Debt.

Contacting the District's Financial Management

This financial report is designed to provide the District's ratepayers, investors, and other readers with a general overview of the District's finances and to show the District's accountability for money it receives. If you have questions about this report or need additional information, contact the District's Director of Finance at Public Utility District No. 1 of Okanogan County, P.O. Box 912, Okanogan, WA 98840, or phone (509) 422-3310.

Note 1 - Summary of Significant Accounting Policies

Organization – Public Utility District No. 1 of Okanogan County (the District) is a municipal corporation governed by an elected three-member board of commissioners. The District owns, operates, and maintains an electric distribution system incorporating both electrical and telecommunications facilities and equipment. Financial information for both divisions is presented as a single proprietary fund.

Reporting entity – For financial reporting purposes, the District includes activities over which it exercises oversight responsibility. As required by generally accepted accounting principles (GAAP), management has considered all potential component units in defining the reporting entity. The District has no component units.

Basis of accounting and presentation – The accounting policies of the District conform to GAAP as applicable to proprietary funds of governmental units. The District adheres to the accounting standards and pronouncements of the Governmental Accounting Standards Board (GASB), which is the accepted standard-setting body for governmental entities and uses the Federal Energy Regulatory Commission (FERC) Uniform System of Accounts.

New accounting standards – In May 2020, prior to the release of these financial statements, the GASB issued Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance*, which delays the effective date of various previously issued statements by either one year or eighteen months, several of which are directly applicable to the District. In accordance with the standard, the District elected to defer the implementation of Statement No. 84, *Fiduciary Activities*, and its related Implementation Guide 2019-2. As discussed below, the District has elected to adopt Statement No. 83, *Certain Asset Retirement Obligations*, and Statement No. 88, *Certain Debt Extinguishment Issues*, in 2019.

In November 2016, the GASB issued Statement No. 83, *Certain Asset Retirement Obligations*, which addresses valuation and disclosure of asset retirement obligations. The statement is effective for financial statements for fiscal years beginning after June 15, 2018. The District adopted this statement in 2019 with no financial statement impact.

In June 2017, the GASB issued Statement No. 87, *Leases*, which establishes revised standards on lease accounting and financial reporting. The statement is effective for financial statements for fiscal years beginning after June 15, 2021. The District is evaluating the impact of this statement on its financial statements.

In March 2018, the GASB issued Statement No. 88, *Certain Debt Extinguishment Issues*, which addresses the defeasance of debt using a government entities' existing resources. The statement is effective for financial statements for fiscal years beginning after June 15, 2018. The District adopted this statement in 2019 with no financial statement impact.

In June 2018, the GASB issued Statement No. 89, *Accounting for Interest Costs Incurred Before the End of a Construction Period*, which establishes guidance designed to enhance the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period. It also simplifies accounting for interest cost incurred before the end of a construction period. The District early implemented this statement in 2018; therefore, no interest has been capitalized starting January 1, 2019.

Note 1 – Summary of Significant Accounting Policies (continued)

Cash and cash equivalents – The District considers all highly liquid investments with an original maturity of three months or less to be cash equivalents.

Investments and restricted assets – The District records investments at fair value in accordance with GASB 72. The District's investment portfolio consists both of fully insured, interest-bearing institutional deposits with terms of one year or less and federal loan and mortgage securities where fair value can deviate from face/par value. For information on fair market value at year-end 2019, see Note 2.

In accordance with board resolutions and bond covenants, a number of separate funds have been established, and cash and investments held in these funds are restricted for special uses as follows:

	 2019	 2018
Rate stabilization fund	\$ 6,000,000	\$ 6,135,000
Employee compensated absences fund	2,000,000	2,000,000
Customer deposit fund	700,000	600,000
Sinking funds - 2010 bonds	216,075	215,976
Vehicle replacement fund	135,000	-
Sinking funds - 2016 bonds	67,053	66,986
Bond reserve fund	 1,944,500	1,944,500
	\$ 11,062,628	\$ 10,962,462

Accounts receivable and allowance for doubtful accounts – The District renders billings for electrical consumption, sales, and services and for wholesale power and telecommunications sales and services on a monthly basis. Management reviews accounts receivable for collectibility on a regular basis, and an allowance for uncollectible accounts is established based on evaluation of specific accounts and historical experience. If the account is determined to be uncollectible, it is turned over to the local credit bureau for collection.

Materials and supplies – Materials and supplies provide for additions, maintenance, and repairs to the utility plant and are valued at weighted-average cost.

Utility plant and depreciation – See Note 3 for asset capitalization, depreciation, and retirement policies.

Unamortized loss on refunding of debt – The difference between the cost to refund outstanding debt and the carrying value of bonds defeased by refunding bonds is deferred and amortized over the shorter of the remaining term of the refunded bonds or the term of the refunding bonds, using the straight-line method and recorded as deferred outflow of resources.

Note 1 – Summary of Significant Accounting Policies (continued)

Compensated absences – The District accrues unpaid personal leave benefit amounts as earned. Accrued personal leave is payable in full upon resignation, termination, retirement, or death.

Net position – Net position consists of the following:

Net investment in capital assets – This component of net position consists of capital assets, net of accumulated depreciation, less outstanding balances of any borrowings that are attributable to the acquisition, construction, or improvement of those assets.

Restricted – This component consists of net position on which constraints are placed as to its use. Constraints include those imposed by creditors (such as through debt covenants), contributors, or laws or regulations of other governments or constraints imposed by law through constitutional provisions or through enabling legislation. Balances currently classified as restricted by enabling legislation include the rate stabilization fund, employee compensated absences fund, customer deposit fund, bond principal and interest (net of accrued interest) due in the upcoming year, and the debt service reserve fund.

Unrestricted – Unrestricted net position components are those that do not meet the definition of "restricted" or "net investment in capital assets."

Revenue recognition – The District recognizes revenue as earned on a monthly basis based on rates established by the District's board of commissioners. Because the customer meters are read and billed at various times during each month, the District estimates unbilled revenues for energy delivered to customers between their last respective cycle billing date and December 31, and it records that amount as unbilled revenue for the current year.

Revenues and expenses – The District distinguishes between operating and nonoperating revenues and expenses. Operating revenues and expenses are derived directly from the provision of wholesale and retail electrical generation, transmission, and distribution sales and service and from providing wholesale telecommunications sales and service. Revenues and expenses ancillary to these purposes are treated as nonoperating.

Contributed capital – Contributions in aid of construction are District-mandated customer connection charges used to fund construction of system properties necessary to extend service to a new customer. These payments are recognized in nonoperating revenue as contributed capital when the associated facilities are constructed or acquired.

Accounting estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Reclassifications – Certain reclassifications have been made to the balances represented in prior-year financial statements to conform to the current-year presentation.

Note 1 - Summary of Significant Accounting Policies (continued)

Pensions – For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of all state-sponsored pension plans and additions to/deductions from those plans' fiduciary net position have been determined on the same basis as they are reported by the Washington State Department of Retirement Systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments of the plan are reported at fair value by the plan.

Significant risk and uncertainties – The District is subject to certain business risks that could have a material impact on future operations and financial performance. These risks include weather and natural-disaster-related disruptions; collective bargaining labor disputes; fish and other Endangered Species Act issues; Environmental Protection Agency regulations; federal government regulations or orders; deregulation of the electrical industry; concentration risk in the form of Wells Hydroelectric Project (Note 11); and, market risks inherent in buying and selling of power, a commodity with inelastic demand characteristics and minimal storage capability.

Note 2 - Deposits and Investments

The District held the following cash and investments at December 31:

	2019	2018
Cash and temporary investments Cash deposits Money market accounts Local government investment pool	\$ 8,410,880 500,000 288,304	\$ 11,706,176 500,000 684,012
Total cash and temporary investments	\$ 9,199,184	\$ 12,890,188

Total restricted cash	 9,462,628	 8,862,462
Restricted investments		
U.S. Treasuries	 1,600,000	2,100,000
Total restricted investments	1,600,000	2,100,000
Total restricted cash and investments	\$ 11,062,628	\$ 10,962,462

Note 2 - Deposits and Investments (continued)

Custodial credit risk – Custodial credit risk is the risk that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments. All District deposits and investments are either insured, registered, or held by the District or its agents in the District's name and are intended to be held to maturity.

Credit risk – Credit risk is the risk that an issuer or counterparty to an investment will not fulfill its obligations. As required by state law, all investments of District funds are obligations of the U.S. government, bankers' acceptances, deposits in the Washington State Treasurer's Local Government Investment Pool, or deposits with Washington State banks and savings and loan institutions. All deposits are either entirely covered by the Federal Deposit Insurance Corporation or by collateral held in a multiple financial institution collateral pool administered by the Washington Public Deposit Protection Commission.

Interest rate risk – Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The District manages this risk by laddering investments and maintaining a variety of investments.

Investments – The District holds investments that are measured at fair value. The District categorized its fair value measurements within the fair value hierarchy established by GAAP. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 inputs are quoted prices in active markets for identical assets, Level 2 inputs are significant other observable inputs, and Level 3 inputs are significant unobservable inputs. Investments in an external government investment pool, such as the Local Government Investment Pool (LGIP), are not subject to reporting within the level hierarchy.

The following tables show the District's investments measured at fair value as of December 31, 2019 and 2018:

Investments by fair value level	Fotal as of ecember 31, 2019	in A Mark Ide As	d Prices active ets for ntical sets vel 1)	Significant Other Observable Inputs (Level 2)	Unol I	gnificant oservable nputs evel 3)

Total	\$	2,100,000	\$ 	\$ 2,100,000	\$	

Note 3 - Utility Plant

Utility plant in service and other capital assets are recorded at cost when the historical cost is known. When historical cost is not known, assets are recorded at estimated fair value. Costs include labor, materials, overhead, capitalized interest, and related indirect costs. The District capitalizes assets with cost in excess of \$5,000. Depreciation expense is computed using the straight-line method employing useful lives of 4 to 50 years. Repairs are charged to operating expenses.

The original cost of operating property retired or otherwise disposed of and the cost of removal, less salvage, is charged to accumulated depreciation. However, in the case of the sale of a significant operating unit or system, the original cost is removed from the utility plant accounts, accumulated depreciation is charged with the accumulated depreciation related to the property sold, and net gain or loss on disposition is credited or charged to income.

Preliminary costs incurred for proposed projects are deferred pending construction of the asset and included in construction work in process. Costs relating to projects ultimately constructed are transferred to utility plant, whereas charges that relate to abandoned projects are expensed.

During two consecutive years (2014 and 2015), the District sustained significant infrastructure damage due to wildfire. The District has substantially completed the replacement of damaged facilities and equipment including electrical distribution and transmission plant. Work orders pertaining to the 2014 losses were completed and closed to plant during 2016 and no further expenditures or recoveries are expected pertaining thereto. Relative to the 2015 losses, there were \$883,862 of recoveries in 2019 but \$0 in recoveries in the previous year 2018. The final recovery in the amount of \$624,265 was received in April 2020.

Note 3 – Utility Plant (continued)

Capital asset activity for the years ended December 31, 2019 and 2018, was as follows:

	Balance January 1, 2019	Additions	Retirements and Transfers	Balance December 31, 2019

Plant-in-service balances presented above include non-depreciable land of \$1,242,224 and \$1,126,051 as of December 31, 2019 and 2018, respectively.

Note 3 - Utility Plant (continued)

At year-end 2017, the District temporarily reclassified \$12,793,151 of construction work in progress pertaining to the Pateros-Twisp transmission line as Unclassified Plant in Service reflecting the substantial completion of the construction phase and the commencement of initial testing. During 2018, upon final completion of the project, the District reallocated these capital expenditures to specific unitized plant assets and began their depreciable life.

In early 2018 the District capitalized \$16,328,415 of licensing and litigation costs pertaining to Enloe Dam into intangible plant assets based on the Board's having approved a design-build agreement for the initial phase of project design and engineering. Later in the year, upon receipt of more precise project cost estimates and continued legal challenges, the project was abandoned and the licensing costs, along with an additional \$2,464,961 in design-build costs residing in construction work in progress, were written off as an extraordinary item (see Note 11 for further description and history of the Enloe Dam project).

An additional \$360,736 worth of labor and materials residing in construction work in progress was expensed to other operating deductions based upon the District's decision to not pursue a new substation in the Gold Creek area of the Methow Valley. The substation was originally deemed to be an integral facet of the Pateros-Twisp transmission line that was completed in 2018 (see Note 13 for detail and history of the Pateros-Twisp transmission line).

Note 4 - Long-Term Debt

During 2010, the District issued \$9,105,000 in 10-year Series A bonds with interest rates ranging from 2.00% to 4.50%, and \$23,355,000 in 30-year Series B taxable Build America Bonds with interest rates ranging between 1.095% and 6.046%. The Build America Bond interest is payable when due, but is subject to federal subsidy rebates of 35%. Subsequent to the time of bond issuance, the Build America Bond interest rebates have become subject to federal financial sequestration policies that have eroded their benefit by an initial high of 8.7% to the current low of 5.9%. From this issuance, \$5,285,000 was used to defease the 2002 bonds, which were fully repaid in 2011. The remaining \$27,175,000 of the new debt was earmarked for capital projects including, but not limited to, the new District headquarters facility constructed in 2010 and the Pateros-Twisp transmission line, now fully complete. This debt is subject to certain covenants.

In 2010, the District authorized a not-to-exceed \$3,667,855 loan with the United States Department of Agriculture (USDA) for broadband improvements related to the American Recovery and Reinvestment Act (ARRA) award granted in 2010. During 2011, the District began drawing funds on the loan and as of December 31, 2015, a total of \$3,602,640 in loan funds related to this award had been received. No further draws have been made since. These funds are to be paid back over a 23-year period starting one year after the initial draw. This initial draw occurred on August 15, 2011. This direct cost of money loan will bear interest at the rate applicable to each advance of loan funds based on the average yield on outstanding marketable obligations of the United States, having a final maturity comparable to the final maturity of the advance. Interest rates as of December 31, 2019, ranged from 2.3223% to 3.6342%. Additional information describing this award can be found in Note 9.

Note 4 - Long-Term Debt (continued)

Late in 2016, the District made the decision to exercise the option of redeeming its outstanding 2003 Series A Parity Bonds through the issuance of a direct-placement junior-lien refunding bond. The 2016 Junior Lien Refunding Revenue Bond was placed with Key Government Finance, Inc. at an interest rate of 1.82% and will be repaid over the exact same term as the 2003 Series A Bonds that it replaced. Final installments of principal and interest are scheduled be made in 2022. Although this is a direct-placement bond, it contains no disparate termination, call, or acceleration provisions that would differentiate it from the District's other outstanding revenue bonds excepting its junior lien status. The bond carries a debt covenant requiring the District to maintain net revenues in each fiscal year that are at least equal to 1.25 times the annual debt service on all outstanding net revenue bonds.

Total long-term debt principal outstanding at December 31, 2019, is \$28,319,658, for which substantially all revenues of the District are pledged as security.

The following are changes in long-term debt for the years ended December 31, 2019 and 2018:

	 Balance January 1, 2019	Add	itions	Payments/ Amortization	De	Balance ecember 31, 2019		Current Portion

During 2017, the District replaced its \$10 million operating line of credit with a new \$20 million aggregate principal line with a maturity date of December 31, 2020. The line of credit is comprised of a \$10 million tax-exempt 2018A Note bearing an interest rate of 2.85% and a \$10 million taxable 2018B Note bearing an interest rate of 3.61%. As of December 31, 2019 and 2018, respectively, there was no outstanding balance on either of the lines of credit.

Note 4 - Long-Term Debt (continued)

The annual debt service payment requirements (principal and interest) on debt outstanding as of December 31, 2019, are as follows:

	_201	6 Bond - di	rect p	lacement	2010 Bonds		ARRA Loan					
	lı	nterest	F	Principal		Interest	Principal		Interest	F	Principal	Total
2020	\$	42,359	\$	762,277	\$	1,322,905	\$ 1,270,000	\$	77,269	\$	161,026	\$ 3,635,836

Note 5 – Retirement and Deferred Compensation Plans

Substantially all of the District's full-time and qualifying part-time employees participate in one of the following retirement systems administered by the Washington State Department of Retirement Systems, under cost-sharing, multiple-employer public employee defined benefit and defined contribution retirement plans. The state legislature establishes and amends laws pertaining to the creation and administration of all public retirement systems.

The Department of Retirement Systems (DRS), a department within the primary government of the State of Washington, issues a publicly available comprehensive annual financial report (CAFR) that includes financial statements and required supplementary information for each plan. The DRS CAFR may be obtained by writing to:

Department of Retirement Systems Communications Unit P.O. Box 48380 Olympia, WA 98540-8380

Or the DRS CAFR may be downloaded from the DRS website at www.drs.wa.gov.

The following table represents the aggregate pension amounts for all plans for the years ended December 31:

Aggregate Pension Amounts - All Plans									
	2019			2018					
Net pension liability	\$	2,964,405	\$	3,879,743					
Deferred outflows of resources	Ψ	861,945	Ψ	791,012					
Deferred inflows of resources		1,933,465		1,839,477					
Pension expense		168,098		167,751					

Note 5 – Retirement and Deferred Compensation Plans (continued)

Public Employees' Retirement System (PERS)

PERS members include elected officials; state employees; employees of the Supreme, Appeals, and Superior Courts; employees of the legislature; employees of district and municipal courts; employees of local governments; and higher education employees not participating in higher education retirement programs. PERS is composed of three separate pension plans for membership purposes. PERS Plans 1 and 2 are defined benefit plans, and PERS Plan 3 is a defined benefit plan with a defined contribution component.

PERS Plan 1 provides retirement, disability, and death benefits. Retirement benefits are determined as 2% of the member's average final compensation (AFC) times the member's years of service. The AFC is the average of the member's 24 highest consecutive service months. Members are eligible for retirement from active status at any age with at least 30 years of service, at age 55 with at least 25 years of service, or at age 60 with at least five years of service. Members retiring from active status prior to the age of 65 may receive actuarially reduced benefits. Retirement benefits are actuarially reduced to reflect the choice of a survivor benefit.

Other benefits include duty and non-duty disability payments, an optional cost-of-living adjustment (COLA), and a one-time duty-related death benefit, if found eligible by the Department of Labor and Industries. PERS 1 members were vested after the completion of five years of eligible service. The plan was closed to new entrants on September 30, 1977.

Contributions

The PERS Plan 1-member contribution rate is established by state statute at 6%. The employer contribution rate is developed by the Office of the State Actuary and includes an administrative expense component that is currently set at 0.18%. Each biennium, the state Pension Funding Council adopts Plan 1 employer contribution rates. The PERS Plan 1 required contribution rates (expressed as a percentage of covered payroll) for 2019 were as follows:

PERS Plan 1		
Actual Contribution Rates	Employer	Employee
January through June 2019	12.83%	6.00%
July through December 2019	12.86%	6.00%

The District's actual contributions to the plan were \$0 for both years ended December 31, 2019 and 2018.

Note 5 – Retirement and Deferred Compensation Plans (continued)

PERS Plan 2/3 provides retirement, disability, and death benefits. Retirement benefits are determined as 2% of the member's AFC times the member's years of service for Plan 2 and 1% of AFC for Plan 3. The AFC is the average of the member's 60 highest-paid consecutive service months. There is no cap on years of service credit. Members are eligible for retirement with a full benefit at 65 with at least five years of service credit. Retirement before age 65 is considered an early retirement. PERS Plan 2/3 members who have at least 20 years of service credit and are 55 years of age or older are eligible for early retirement with a benefit that is reduced by a factor that varies according to age for each year before age 65. PERS Plan 2/3 members who have 30 or more years of service credit and are at least 55 years old can retire under one of two provisions:

- With a benefit that is reduced by 3% for each year before age 65; or
- With a benefit that has a smaller (or no) reduction (depending on age) that imposes stricter return-towork rules.

PERS Plan 2/3 members hired on or after May 1, 2013, have the option to retire early by accepting a reduction of 5% for each year of retirement before age 65. This option is available only to those who are age 55 or older and have at least 30 years of service credit. PERS Plan 2/3 retirement benefits are also actuarially reduced to reflect the choice of a survivor benefit. Other PERS Plan 2/3 benefits include duty and non-duty disability payments, a cost-of-living allowance (based on the consumer price index), capped at 3% annually and a one-time duty-related death benefit, if found eligible by the Department of Labor and Industries. PERS 2 members are vested after completing five years of eligible service. Plan 3 members are vested in the defined benefit portion of their plan after ten years of service, or after five years of service if 12 months of that service is earned after age 44.

PERS Plan 3 defined contribution benefits are totally dependent on employee contributions and investment earnings on those contributions. PERS Plan 3 members choose their contribution rate upon joining membership and have a chance to change rates upon changing employers.

As established by statute, Plan 3 required defined contribution rates are set at a minimum of 5% and escalate to 15% with a choice of six options. Employers do not contribute to the defined contribution benefits. PERS Plan 3 members are immediately vested in the defined contribution portion of their plan.

Note 5 – Retirement and Deferred Compensation Plans (continued)

Contributions

The PERS Plan 2/3 employer and employee contribution rates are developed by the Office of the State Actuary to fully fund Plan 2 and the defined benefit portion of Plan 3. The Plan 2/3 employer rates include a component to address the PERS Plan 1 unfunded actuarial accrued liability (UAAL) and an administrative expense that is currently set at 0.18%. Each biennium, the state Pension Funding Council adopts Plan 2 employer and employee contribution rates and Plan 3 contribution rates. The PERS Plan 2/3 required contribution rates (expressed as a percentage of covered payroll) for 2019 were as follows:

PERS Plan 2/3 Actual Contribution Rates	Employer 2/3	Employee 2	Employee 3
January through June 2019	12.83%	7.41%	Varies
July through December 2019	12.86%	7.90%	Varies

The District's actual contributions to the plan were \$1,075,451 and \$1,023,302 for the years ended December 31, 2019 and 2018, respectively.

Actuarial Assumptions

The total pension liability (TPL) for each of the DRS plans was determined using the most recent actuarial valuation completed in 2019 with a valuation date of June 30, 2018. The actuarial assumptions used in the valuation were based on the results of the Office of the State Actuary's (OSA) 2007–2012 Experience Study and the 2017 Economic Experience Study.

Additional assumptions for subsequent events and law changes are current as of the 2018 actuarial valuation report. The TPL was calculated as of the valuation date and rolled forward to the measurement date of June 30, 2019. Plan liabilities were rolled forward from June 30, 2018, to June 30, 2019, reflecting each plan's normal cost (using the entry-age cost method), assumed interest, and actual benefit payments.

- Inflation: 2.75% total economic inflation; 3.50% salary inflation
- Salary increases: In addition to the base 3.50% salary inflation assumption, salaries are also expected to grow by promotions and longevity
- Investment rate of return: 7.4%

Note 5 - Retirement and Deferred Compensation Plans (continued)

Mortality rates were based on the RP-2000 report's Combined Healthy Table and Combined Disabled Table, published by the Society of Actuaries. The OSA applied offsets to the base table and recognized future improvements in mortality by projecting the mortality rates using 100% Scale BB. Mortality rates are applied on a generational basis, meaning that each member is assumed to receive additional mortality improvements in each future year throughout his or her lifetime.

There were minor changes in methods and assumptions since the last valuation. Those applicable to the District are listed below:

- OSA updated modeling to reflect providing benefit payments to the date of the initial retirement eligibility for terminated vested members who delay application for retirement benefits.
- OSA updated COLA programming to reflect legislation signed during the 2018 legislative session that
 provides PERS and TRS Plan 1 annuitants who are not receiving a basic minimum, alternate
 minimum, or temporary disability benefit with a one-time permanent 1.5% increase to their monthly
 retirement benefit, not to exceed a maximum of \$62.50 per month.

Discount Rate

The discount rate used to measure the total pension liability for all DRS plans was 7.4%.

To determine that rate, an asset sufficiency test included an assumed 7.5% long-term discount rate to determine funding liabilities for calculating future contribution rate requirements. Consistent with the long-term expected rate of return, a 7.4% future investment rate of return on invested assets was assumed for the test. Contributions from plan members and employers are assumed to continue being made at contractually required rates (including PERS 2/3 employers, whose rates include a component for the PERS 1 liabilities). Based on these assumptions, the pension plans' fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return of 7.4% was used to determine the total liability.

Long-Term Expected Rate of Return

The long-term expected rate of return on the DRS pension plan investments of 7.4% was determined using a building-block-method. In selecting this assumption, the Office of the State Actuary (OSA) reviewed the historical experience data, considered the historical conditions that produced past annual investment returns, and considered capital market assumptions and simulated expected investment returns provided by the Washington State Investment Board (WSIB). The WSIB uses the capital market assumptions and their target asset allocation to simulate future investment returns over various time horizons.

Note 5 – Retirement and Deferred Compensation Plans (continued)

Estimated Rates of Return by Asset Class

Best estimates of arithmetic real rates of return for each major asset class included in the pension plan's target asset allocation as of June 30, 2019, are summarized in the table below. The inflation component used to create the table is 2.2% and represents the WSIB's most recent long-term estimate of broad economic inflation.

Asset Class	Target Allocation	Percent Long-Term Expected Real Rate of Return Arithmetic
- : .:	000/	0.000/
Fixed income	20%	2.20%
Tangible assets	7%	5.10%
Real estate	18%	5.80%
Global equity	32%	6.30%
Private equity	23%	9.30%
	100%	

Sensitivity of Net Pension Liability (Asset)

The table below presents the District's proportionate share of the Net Pension Liability (NPL) calculated using the discount rate of 7.4%, as well as what the District's proportionate share of the NPL would be if it were calculated using a discount rate that is 1 percentage point lower (6.4%) or 1 percentage point higher (8.4%) than the current rate.

				Current			
	19 	1% Decrease (6.4%)		scount Rate (7.4%)	1% Increase (8.4%)		
PERS 1	\$	2,798,976	\$	2,235,036	\$	1,745,743	
PERS 2/3		5,593,974		729,369		(3,262,360)	

Pension Plan Fiduciary Net Position

Detailed information about the State's pension plans' fiduciary net position is available in the separately issued DRS financial report.

Note 5 – Retirement and Deferred Compensation Plans (continued)

Pension Liability, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2019 and 2018, the District reported a total pension liability of \$2,964,405 and \$3,879,743, respectively, for its proportionate share of the net pension liabilities as follows:

	 Liability						
	 2019		2018				
PERS 1 PERS 2/3	\$ 2,235,036 729,369	\$	2,606,288 1,273,455				

At December 31, 2019, the District's proportionate share of the collective net pension liabilities was as follows:

	Proportionate	Proportionate	Change in		
	Share 6/30/18	Share 6/30/19	Proportion		
PERS 1	0.058358%	0.058123%	-0.000235%		
PERS 2/3	0.074584%	0.075089%	0.000505%		

Employer contribution transmittals received and processed by the DRS for the fiscal year ended June 30 are used as the basis for determining each employer's proportionate share of the collective pension amounts reported by the DRS in the *Schedules of Employer and Nonemployer Allocations*.

Pension Expense

For the years ended December 31, 2019 and 2018, the District recognized pension expense as follows:

	 Pension Expense					
	 2019		2018			
PERS 1 PERS 2/3	\$ 91,260 76,838	\$	233,721 (65,970)			

Note 5 – Retirement and Deferred Compensation Plans (continued)

Deferred Outflows of Resources and Deferred Inflows of Resources

At December 31, 2019, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

PERS 1		red Outflows Resources	Deferred Inflows of Resources	
Differences between expected and actual experience Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions Changes in proportion and differences between contributions and proportionate share of	\$	- - -	\$	- (149,319) -
contributions Contributions subsequent to the measurement date		235,156		<u>-</u>
	\$	235,156	\$	(149,319)
PERS 2/3		red Outflows Resources		erred Inflows Resources
Differences between expected and actual experience Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions Changes in proportion and differences between contributions and proportionate share of	\$	208,966 - 18,677	\$	(156,810) (1,061,665) (306,019)
· ·		4 4 0 0 =		
contributions Contributions subsequent to the measurement date		14,365 384,781		(259,652)

Note 5 – Retirement and Deferred Compensation Plans (continued)

Combined PERS 1 and PERS 2/3		red Outflows Resources	Deferred Inflows of Resources		
Differences between expected and actual experience	\$	208,966	\$	(156,810)	
Net difference between projected and actual investment earnings on pension plan investments Changes of assumptions		- 18,677		(1,210,984) (306,019)	
Changes in proportion and differences between contributions and proportionate share of contributions		14,365		(259,652)	
Contributions subsequent to the measurement date	\$	619,937 861,945		(1,933,465)	

Deferred outflows of resources related to pensions resulting from the District's contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended December 31, 2020. Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

	<u>F</u>	PERS 1	PERS 2/3		Combined	
2020	\$	(32,963)	\$	(391,278)	\$	(424,241)

2023		(10,413)		(184,621)		(195,034)
2024		-		(76,269)		(76,269)
Thereafter				7,148		7,148
						_
	\$	(149,319)	\$	(1,542,138)	\$	(1,691,457)

Deferred compensation plans – The District offers its employees two deferred compensation plan options created in accordance with Internal Revenue Code Section 457, covering all eligible employees of the District, as defined in the plan documents. These plans allow employees to defer a portion of their salary until future years. Plan assets are held in trust for the exclusive benefit of the plan participants and their designated beneficiaries and are not subject to the claims of the District's general creditors. Deferred compensation funds are not available to employees until retirement, termination, death, or unforeseeable emergency.

Additionally, the District adopted a 401(a) defined contribution plan (the 401(a) Plan) effective January 1, 2000. Participation in the 401(a) Plan is open to eligible employees of the District as defined in the plan document. The District makes matching contributions to the 401(a) Plan at a rate of 50% of the employee's contribution to their 457 deferred compensation plan. The match is capped at 2% of gross wages for nonexempt employees and 6% of gross wages for exempt employees. During 2019 and 2018, the District contributed \$189,619 and \$182,221, respectively, to the 401(a) Plan.

Note 5 - Retirement and Deferred Compensation Plans (continued)

VEBA plan – In August 2005, the District implemented a voluntary employees' beneficiary association (VEBA) plan designed to provide limited employer funding on a tax-free basis for employee medical premiums and benefits for all eligible employees of the District, as defined in the plan document. The District's current VEBA contribution rate is \$150 per month per employee for all employees having met the annual qualification requirements. Plan assets, although under District control, are held in trust for the exclusive benefit of the plan participants and their designated beneficiaries and are not subject to the claims of the District's general creditors. During 2019 and 2018, the District contributed \$172,500 and \$171,750, respectively, to the VEBA plan.

Note 6 - Other Post-Employment Benefits

Effective January 1, 2015, the partial reimbursement for health care insurance premiums for retired employees was discontinued. In lieu thereof, an HRA VEBA contribution will be made by the District for employees voluntarily separating service after December 31, 2014, and who have reached their 50th birthday as of their separation date/last date of employment. Employees separating service between January 1, 2015, and December 31, 2015, were eligible for \$4 times years of service times remaining months between their 60th and 65th birthday. The dollar value of the contribution was set to decrease \$1 each year until it expired on December 31, 2018. There was no remaining OPEB future liability at either December 31, 2019 or 2018. The District was previously funding the liability on a pay-as-you-go basis with contributions of \$0 and \$5,096 expensed in 2019 and 2018, respectively.

Note 7 - Self Insurance

The District is a member of Public Utility Risk Management Services Joint Self Insurance Fund (the Fund). Chapter 48.62 RCW authorizes the governing body of one or more governmental entities to form together into or join an organization for the joint purchasing of insurance, and/or joint self-insuring, and/or joint hiring or contracting for risk management services to the same extent that they may individually purchase insurance, self-insure, or hire or contract for risk management services. The Fund was formed on December 31, 1976, when certain Washington Public Utility Districts signed an agreement to pool their self-insured losses and jointly purchase insurance and administrative services. There are currently 19 active members in the Fund.

Note 7 - Self Insurance (continued)

The Fund operates three separate insurance pools: the Liability Pool, the Property Pool, and the Health and Welfare Pool. Fund members may belong to one, two, or all three pools according to their insurance needs. The Liability Pool insures on a \$1,000,000 self-insured retention with a \$250 deductible. Coverage is on an occurrence basis. In addition, the Liability Pool purchases excess general liability and excess public official liability coverage. The Property Pool operates on a maximum \$500,000 self-insured retention, with a \$75,000 deductible on listed major generating units and a \$250 deductible on all other listed items of property. Coverage is on an occurrence basis and the Property Pool purchases excess property coverage above the self-insured retention level. The Health and Welfare Pool is funded by paid claims reimbursement from the member generating the claim and by pooled assessment for administration and excess stop-loss insurance coverage. In all pools, members are assessed as necessary to maintain designated minimum pool balances. Because the Fund is a cooperative program, there is joint liability among the participants of each pool. The District participates in only the Liability and Property Pools. In 2019 and 2018, the District contributed \$70,297 and \$91,902, respectively, to the Liability Pool and \$55,004 and \$27,848, respectively, to the Property Pool. Should any member terminate its affiliation with the Fund, it remains financially responsible to the Fund for any unresolved, unreported, and in-process claims for the period that it was a signatory to the agreement.

Self-insured retentions are fully funded by current and former members, and claims settlements have rarely exceeded retention levels resulting in escalation to excess coverage policies. Claims are processed by Pacific Underwriters Corporation, P.O. Box 68787, Seattle, WA 98168, a private entity contracted to perform administrative, claims adjustment, and loss prevention services, and which also compiles an annual financial report for the Fund. The Fund is governed by a board of directors that consists of one designated representative from each participating member. The Fund administrator and an elected six-member administrative committee (on which a District representative currently serves) are responsible for business decision-making and conducting the daily business affairs of the Fund.

Note 8 - Conservation Programs

The District has historically offered a variety of energy conservation programs. These have included both residential and commercial weatherization loan programs, energy-use efficiency programs, and residential and commercial energy audits. Loan programs provided five-year loans of up to \$10,000 to residential customers and up to \$25,000 to commercial enterprises for qualifying conservation measures. Due to the satisfactory achievement of the loan program's intended purposes and declining utilization, as of October 31, 2019, the District made the decision to terminate the issuance of new loans and let the outstanding ones run their normal repayment course. The District carried loan balances receivable of \$236,423 and \$156,116 at December 31, 2019 and 2018, respectively, and incurred net general conservation program costs of \$(84,649) and (\$39,788), respectively, in those fiscal years, which were charged to operations.

Note 9 - Telecommunications

The District has recognized the necessity of a modern and reliable communications infrastructure in managing its core electric distribution function and now operates and maintains a telecommunications network providing these services for internal use. Additionally, it provides wholesale telecommunications services, in accordance with Washington State law, to qualified retail merchants who, in turn, provide services to end users in the District's service territory.

The ongoing construction and the operations of the telecommunications network are being accomplished using the District's own workforce. The District has established separate detailed accounting for wholesale telecommunications activities and has developed a financing arrangement under which the continuing construction of telecommunications infrastructure and the operations of the telecommunications network are accomplished using funds loaned from the District's electric reserves.

Condensed telecom revenue/expenditure, assets/liabilities, and net position information follows:

	2019		2018	
Operating revenues Operating expenses Nonoperating revenues Nonoperating expenses	\$	2,844,369 (2,872,835) 56,046 (109,836)	\$	2,990,694 (2,786,772) 57,069 (141,984)
Change in net position	\$	(82,256)	\$	119,007
Total assets Total liabilities	\$	7,801,797 (2,946,256)	\$	8,291,420 (3,353,626)
Total net position	\$	4,855,541	\$	4,937,794

During 2010, the District applied for and was awarded ARRA funding to further deploy broadband communication services in the underserved areas of Okanogan County. The award package consisted of \$5,501,782 in grant money and a \$3,667,855 loan. The project was designed to bring high-speed broadband to approximately 6,543 premises that previously lacked access, and called for placement of approximately 170 access nodes and 179 miles of fiber backbone. The project was completed in 2015 with the District having received a total of \$5,403,960 in grant funding and \$3,602,640 in loan funding against the accumulated project expenditures (see Note 4 for detail of debt service on this loan).

Public Utility District No. 1 of Okanogan County, Washington Notes to Financial Statements

Note 10 – Energy Northwest

ENW Nuclear Project Nos. 1, 2, and 3 – The District has entered into "net billing agreements" with Energy Northwest (ENW, formerly Washington Public Power Supply System) and the Bonneville Power Administration (BPA). Under terms of these agreements, the District has purchased a maximum of .255% and 1.042% of the capability of ENW's Nuclear Project Nos. 1 and 2, respectively, and .143% of the capability of ENW's 70% ownership share of its Nuclear Project No. 3, and has assigned this capability to BPA. BPA is unconditionally obligated to pay the District, and the District is unconditionally obligated to pay ENW, the pro rata share of the total annual costs of each project, including debt service on revenue bonds issued to finance the projects, whether or not the projects are completed, operable, or operating and notwithstanding the suspension, reduction, or curtailment of the projects' output.

Nuclear Project Nos. 1 and 3 were approximately 63% and 75% complete, respectively, and had both been in a state of extended construction delay for many years, with all systems being maintained in condition to resume construction at any time. However, on May 13, 1994, the ENW full board of directors voted to declare termination of both projects. At this juncture, there has been no resolution concerning the final dispensation of the assets and liabilities associated therewith.

Nuclear Project No. 2 was completed and placed in operation on December 13, 1984.

The District's net billing obligations in 2019 (2020 ENW Budget Year) and 2018 (2019 ENW Budget Year) were as follows:

ENW Fiscal 2020 Budget Year	No. 1	No. 2	No. 3	Total
Annual budget District's share	\$ 41,676,000 0.00255	\$ 668,852,000 0.01042	\$ 46,288,000 0.00143	\$ 756,816,000
District's net billing obligation	106,274	6,969,438	66,192	7,141,903
ENW Fiscal 2019 Budget Year				
Annual budget	\$ 42,166,000	\$ 433,214,000	\$ 41,751,000	\$ 517,131,000
District's share	0.00255	0.01042	0.00143	
District's net billing obligation	107,523	4,514,090	59,704	4,681,317

Hanford project – In accordance with agreements between ENW, BPA, and 76 participants and between ENW and the U.S. Department of Energy (DOE), ENW constructed the Hanford Project, which began commercial operation in 1966 with a capacity of approximately 860 MW.

Pursuant to an exchange agreement entered into between the District, ENW, and BPA, the District had purchased 0.424% of the output of the Hanford Project and is obligated to pay ENW the same percentage of the annual costs.

Under an exchange agreement with the other participants in the Hanford Project, BPA had acquired the capability of the Hanford Project, including the District's share, in exchange for power from BPA. A decision was made in February 1988 by the DOE to maintain the project in a "cold standby" mode of operation.

Public Utility District No. 1 of Okanogan County, Washington Notes to Financial Statements

Note 10 - Energy Northwest (continued)

ENW has evaluated alternative energy uses for the plant to no avail. Current options include a transfer to DOE for removal and site restoration, or removal and site restoration by ENW. At this time, it is unknown what the eventual disposition of the Hanford Project will be. ENW has reduced the project's assets to net realizable value and accrued the estimated cost of removal and site restoration.

Nine Canyon Wind Project – On October 1, 2001, the District entered into a power purchase agreement with ENW for output from the Nine Canyon Wind Project. The original project consisted of 37 wind turbines, with an aggregate generating capacity of approximately 48 MW, and was launched into commercial operation in fall 2002. During 2003, a second phase of the project was completed, adding an additional 12 turbines and bringing the project capacity up to about 63.7 MW. During 2006, a third phase of the project was completed, adding an additional 14 turbines and bringing the current total project capacity up to about 96 MW.

The District is currently one of 10 public utility Districts participating in the power purchase agreements for project output. The District purchased a 25% share of the generation output from Phases 1 and 2 and no output at all from Phase 3, bringing its combined share of total project output to 16.61%. The District is committed to paying its pro rata share of debt service on the Nine Canyon Wind Project Revenue Bonds issued by ENW for Phases 1 and 2. A bond refunding/reissuance process commenced in 2004 and completed in 2005, thereby establishing the District's estimated liability for project bond principal at \$23,312,500. That amount could escalate to as much as \$29,140,625 after a step-up provision that could trigger in the event that other purchasers defaulted on their contractual obligations. The District pays its share of the ongoing project operational costs through monthly power purchase agreement assessment invoices, which were consistently \$220,021 throughout both 2019 and 2018.

Financial and operating information regarding Energy Northwest may be obtained from Energy Northwest at PO Box 968, Richland, WA, 99352.

Note 11 - Other Power Supply Agreements

Wells Hydroelectric Project — Since the initial construction of the Wells Hydroelectric Project, the District has been a party to a power sales contract governing the apportionment of the project output. The District's current share of the total output from Wells Hydroelectric Project is 9.45%, which represents 36.62% and 37.60% of the District's total power purchases in 2019 and 2018, respectively. During the 1980s, both the District and Public Utility District No. 1 of Douglas County (Douglas PUD) contested several provisions of the 1963 agreement and sought resolution of the disputed issues in Chelan County Superior Court. Disputes between the parties were resolved with a Memorandum of Understanding signed on August 5, 1991, requiring the two Districts to negotiate a new power sale contract commencing in September 2018 and extending for an additional 50 years. Negotiations on this contract concluded with the placement of the final signatures on May 15, 2017. The terms of the contract will allow the District's portion of the project output to grow relative to its increasing loads until peaking at a 30% share. The District's annual contractual purchases are to be priced at its respective output percentage multiplied by the actual annual Wells Project cost of production and operation. The District expended \$3,831,803 and \$3,985,033 on Wells power purchases in 2019 and 2018, respectively.

Public Utility District No. 1 of Okanogan County, Washington Notes to Financial Statements

Note 11 - Other Power Supply Agreements (continued)

Enloe Hydroelectric Project – For several decades the District has been pursuing the possible rehabilitation of Enloe Hydroelectric Dam on the Similkameen River near Oroville, Washington. The District is the present owner of the dam, and relicensing attempts prior to 2005 were intended to revive an existing facility with its original output of 26,000 MWh annually and installed capacity of 4,100 KW.

On March 3, 1983, and again on September 13, 1996, the District obtained FERC licenses for renovation and resumed operation of the Enloe project. In both cases, the licenses were later rescinded due to appeals of the licensing provisions, open-ended opportunities for federal agencies to modify the terms, the potential of requiring fish passage after the fact, and the listing of new endangered species.

On January 21, 2005, the District again submitted a new application to FERC for a preliminary permit on the project using the FERC Traditional Licensing Process (TLP). The proposed configuration would approximately double the project output to 47,300 MWh of energy per year and 9,000 KW of capacity.

After spending the better part of a decade on environmental assessments, resource studies, permitting issues, and litigation the District received a new 50-year operating license on July 9, 2013, and began preparing for final design, financing, bidding, and construction of the project. While continuing its compliance with all license terms, in early 2015 it was determined that the District was encountering significant time constraints so, on March 19, 2015, the District submitted a request for a two-year extension of the commencement-of-construction deadline. The extension was granted on July 31, 2015, and on May 9, 2016, the District Board of Commissioners formally declared by Resolution #1620 their intent to construct a new powerhouse and reenergize Enloe Dam. Utilizing the Design-Build contract methodology, a Phase 1 agreement was executed April 16, 2018, that was to complete 30% of the project design and deliver a firm not-to-exceed estimate of cost. Upon receipt of the Phase 1 Report, noting the complexity, controversy, risk, and considerable escalation in anticipated cost, the District Board of Commissioners made the decision on November 19, 2018, to forego further pursuit of reenergizing the facility and to focus strictly on site preservation and safety concerns while exploring alternative uses or dispossession of the asset. Enloe related activities pursued during 2019 included updating the Dam Safety Plan and the analysis of proposed options to dewater and closely inspect the face and toe of the dam. The currently preferred alternative to accomplish this goal is to refurbish/rebuild the original dam gates and penstocks to divert the entire river flow around the spillway. This option allows for recurrent future inspections as changing regulations may dictate. Detailed cost analysis of this option is ongoing.

Note 12 - Northwest Open Access Network

The District is a member of Northwest Open Access Network (NoaNet), a nonprofit mutual corporation formed by the District in collaboration with several other public utilities in the state of Washington. NoaNet was incorporated in February 2000 to facilitate the construction of a communications backbone to accommodate the increasing broadband needs of the member utilities and their customers. The NoaNet network began commercial operation in early 2001.

Public Utility District No. 1 of Okanogan County, Washington Notes to Financial Statements

Note 12 - Northwest Open Access Network (continued)

As of December 31, 2016, NoaNet had a \$13 million line of credit with Wells Fargo Bank with an outstanding balance of \$9,350,638. In early 2017, they established a new banking relationship with Washington Trust Bank creating new accounts through which they retired all outstanding Wells Fargo debt. Currently active accounts are a seven-year long-term loan in the amount of \$10.2 million, a \$3 million term loan, a \$2 million capital line of credit, a \$2 million operating line of credit and a \$665 thousand term loan. The balances owed on these five accounts at December 31, 2019, are \$6,548,148, \$2,600,693, \$2,000,000, \$900,000, and \$665,000 respectively. A member-financed line of credit in the amount of \$1.56 million was also established in 2019, against which NoaNet had drawn \$665,000 by year-end.

The District's ownership interest in NoaNet was 8.04% as of December 31, 2019 and 2018. During 2019, NoaNet incurred a net loss from operations of \$4,232,357. This operating loss, partially offset by interest revenue but increased by interest expense, reduced net position of \$56,675,880 in 2018 to \$51,872,093 in 2019. NoaNet financial results for 2019 are estimated; however, any variance will not have a material impact on the District's financial position.

Financial and operating information regarding NoaNet may be obtained from the NoaNet Financial Center, 5802 Overlook Ave NE, Tacoma, WA 98422.

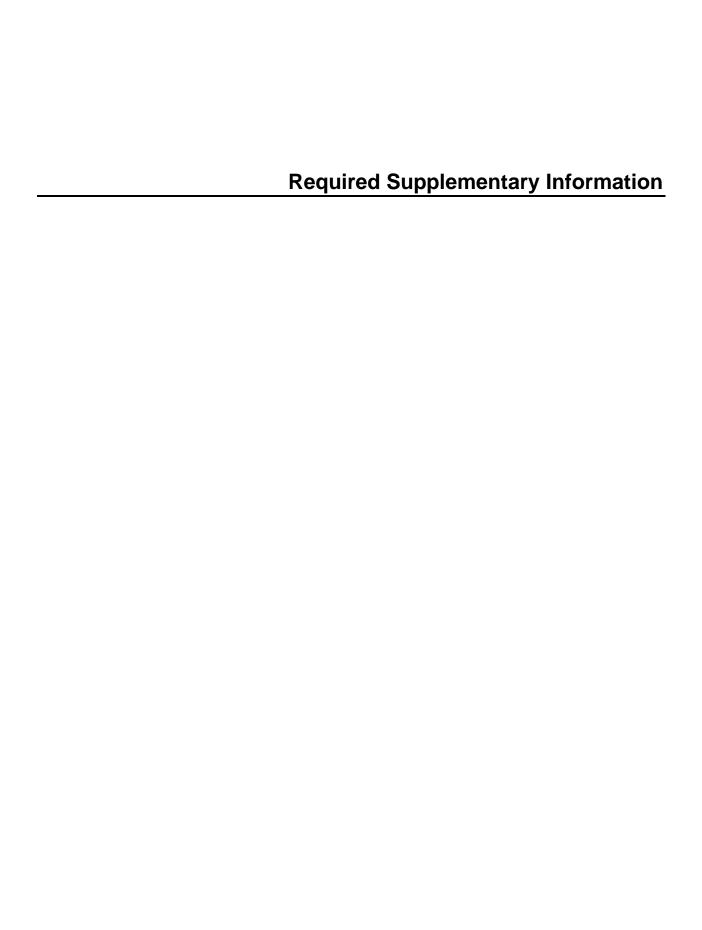

Note 13 - Pending Litigation

Employee termination litigation – The District's Board of Commissioners terminated the District's General Manager for cause on October 23, 2017. A lawsuit alleging wrongful discharge and breach of contract has been initiated by the former General Manager in Okanogan County Superior Court. The District's insurance provider has retained legal counsel to provide defense in the case; however, judgements levied in breach of contract cases are not insurable and the outcome of such lawsuits cannot be predicted. As of the date of this audit report, the litigation is ongoing.

Claims – The District is involved in various minimal claims arising in the normal course of business. The District does not believe that the ultimate outcome of these matters will have a material adverse impact on its financial position.

Note 14 - Subsequent Events

On March 11, 2020, the World Health Organization officially declared COVID-19, the disease caused by the novel coronavirus, a pandemic. Management is closely monitoring the evolution of this pandemic, including how it may affect the economy and the general population. Given the dynamic nature of these circumstances and potential business disruption, the District could experience a significant short-term impact to operations. Management will continue to monitor the situation closely, but given the uncertainty about the situation, it is unable to estimate the impact to the financial statements.

Report of Independent Auditors on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Commissioners
Public Utility District No. 1
of Okanogan County, Washington

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of Public Utility District No. 1 of Okanogan County, Washington (the District), which comprise the statements of net position as of December 31, 2019, and the related statements of revenues, expenses, and changes in net position and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated May 29, 2020.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be significant deficiencies or material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

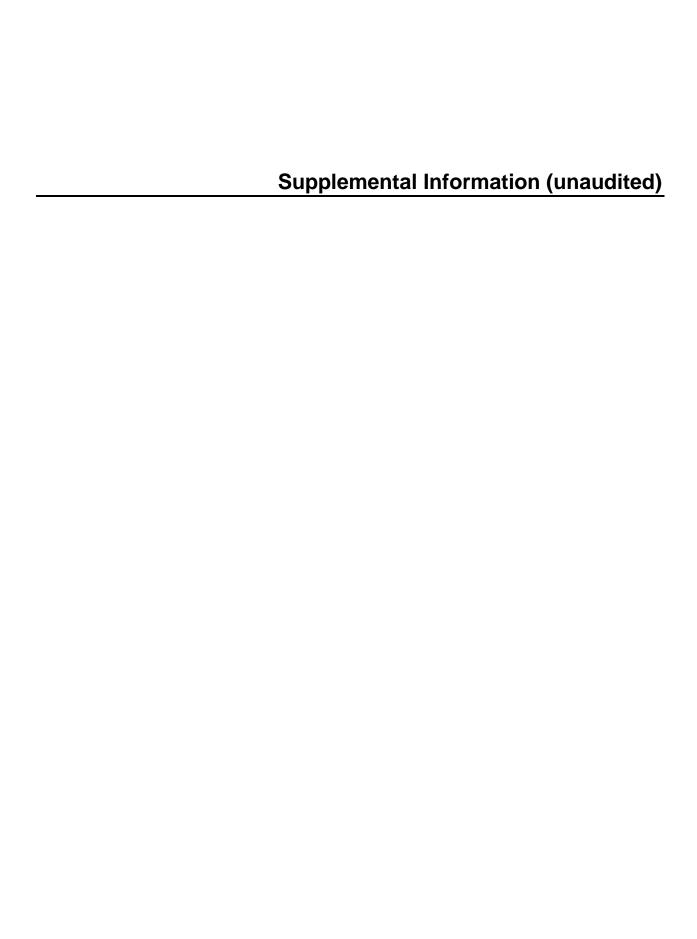

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
